

## Flexible use

The highest **mounting flexibility** on both pneumatic actuators and manual valves.

The technopolymer engineered casing provides weight reduction and **resistance to corrosion** in every environment.

## Smart design

**Fast and easy mounting** and cabling.

The instructions are always readily available through the QR code.

**High visibility flow indication** to minimize reading errors.

## THE LIMIT SWITCH BOX EVOLUTION

From the experts of plastic in **corrosive environments** comes a new limit switch box **designed to make installation easy and quick.**

# LSQT Limit switch box quarter turn

**FIP Formatura Iniezione Polimeri**

Loc. Pian di Parata

16015 Casella Genova Italy
